Circular V23/2002

Ref V13/1/4/2/1/P

**To all State Veterinarians
All State Veterinary Offices**

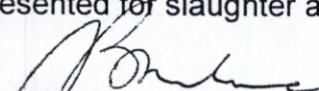

RE: Register of Imported Livestock

To improve on the traceability of animals imported into Namibia, State veterinarians at a meeting held at Swakopmund on 14 October 2002, decided that a register of imported animal be kept at all offices.

The register should include the following information:

- Import permit Number:
- Name of importer
- Farm name and number
- Phone number
- Species and Identity of animals (where applicable)
- Date of import

You are further reminded to ensure that all import conditions including tests are met. In the case of cattle, the animals must be branded to ensure that they are not presented for slaughter at export abattoirs.

**For: Director of Veterinary Services
Ministry of Agriculture Water and Rural Development**

The last circular V22/2002 dealt with Implementation of the Revised Monthly Return: AHI and was sent to State Veterinarians and all State Veterinary Offices.
